

# Angel Morales

Software Engineer

Greetings HIRINGMANAGERNAME,

My interest in COMPANYNAME began after a coffee chat with NETWORKEDCONTACT. I admire the dedication and passion showed in FIELDOFWORK. I too want to play a role in the FIELDOFWORK and I'd like to do so as a Software Engineer with COMPANYNAME.

I am a medical school graduate, who restructured priorities when the pandemic came into the picture. As a general practitioner who took part in hospital care as well as one-on-one consultations, I excelled in learning in a fast pace, high-stress, low-sleep environment, and thrived in a collaborative workplace. I have experience working in high-intensity, high-stakes scenarios, delivering and performing crucial work and care.

Now as a software engineer at 100Devs, I've worked on different full-stack applications, from design, coding, and testing to documentation and implementation. Most recently, I developed a PROJECTNAME, an online video chat application tailored for group studying and learning for the chosen skill. coding, language, gaming, and anything the users want to practice. It is a fully responsive modern design, built using HTML, CSS, JavaScript, Express as a framework for Node.js, EJS as a templating language, and MongoDB as a database.

My commitment, perseverance, and initiative make me a perfectly capable candidate for the Software Engineering position in the TEAMNAME. I'm excited about the opportunity to work on behalf of the CLIENTS/USERS of COMPANYNAME. I look forward to hearing back from you soon.

My thanks,

Angel
